

Mac OS

Printing to PaperCut with a Mac

To properly print to PaperCut from a Mac, you need to have NoMAD setup properly (see [this Albert article to setup NoMAD on your Mac](#)), remove all traces of UniFLOW (Carthage's previous universal printing solution), and then properly install and setup the PaperCut printing client and black & white printer.

Removing UniFLOW

First, remove the UniFLOW Preference Pane.

1. Navigate to **Apple menu > System Preferences...**
2. If there's a **UniFLOW preference pane**, it'll be in the 5th row of icons.
 - If you don't see a UniFLOW preference pane, head on down to the next section.
 - If you do, right-click on it, and select Remove "UniFLOW" Preference Pane.

Next, the printer.

1. Navigate to **Apple menu > System Preferences...**
2. Navigate to **Printers & Scanners** (2nd row, 6th column)
3. If there's a **UniFLOW or CarthagePrint** printer listed there, click on it, and then click the **MINUS (-) button** at the bottom of the list to remove it.

Remove the UniFLOW client from startup.

1. Navigate to **Apple menu > System Preferences...**
2. Navigate to **Users & Groups** (4th row, 1st column)
3. Navigate to the **Login Items** tab on the top.
 - If you see **UniFLOW Client** in the list of apps, click on it, and then click the **MINUS (-) button**.
 - If you don't see UniFLOW Client in the list of apps, proceed.

Finally, remove the UniFLOW client from the machine.

1. Open a **Finder** window and navigate to the **Applications folder** (/Applications)
2. Delete the **UniFLOW** folder. It contains the UniFLOW client and some other stuff UniFLOW uses.
3. Restart your computer.
4. Log back in and empty your computer's trash.

Install the PaperCut Client

1. Download [PCClient.zip](#) (you must be signed into Google with a Carthage email to download the ZIP).
2. Navigate to your **Downloads folder** (or wherever you saved the ZIP) and double-click **PCClient.zip** to unzip the file.

Mac OS

3. Move **PCClient** to your **Applications folder**.
4. Navigate to **Apple menu > System Preferences...**
5. Open **Users & Groups** (4th row, 1st column)
6. Navigate to the **Login Items** tab on the top.
7. Click the **PLUS (+) button**, and add **PCClient** to your login items. Click the **Hide checkbox** next to it.
8. Restart your computer.

Install the PaperCut Printer

Make sure you're signed into NoMAD before proceeding.

1. Navigate to **Apple menu > System Preferences...**
2. Open **Printers & Scanners** (2nd row, 6th col)
3. If the lock in the lower-left corner of the window is in the locked position (
