

Windows OS

How do I connect to the Carthage-Open network on Windows?

1. Make sure your Wi-Fi is on.
2. Two SSIDs are available on campus. Carthage-Open and Carthage-Secure. Choose "Carthage-Open."
3. Once connected you will need to register your machine before you have access to the network. To do so, simply open a web browser and you will be automatically directed to the captive-portal. Or click on the message provided by Windows similar to the one below:
4. At the captive portal you must accept the "Acceptable Use Policy", enter your Carthage username and password and click "Login."
5. The network activation process can take upwards of 90 seconds. Please be patient as the progress bar is on your screen.
6. Upon successful registration, your device will be registered for 180 and you will have full access to the Internet.
