

Network Access and Device Registration

How do I register gaming devices for use on the Carthage network?

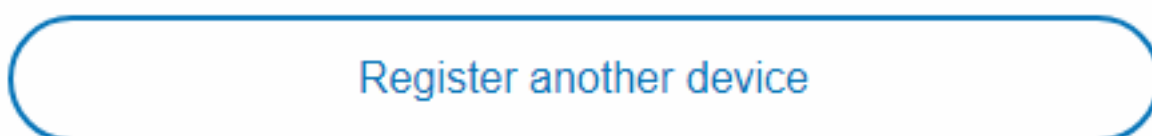

If your device has a browser, please use your browser to go to <https://connect.carthage.edu/device-registration> directly. If it does not have a browser, you can still register it online by [finding your device's MAC address](#) and then following the steps below:

1. On a device that has already been granted access to the Carthage network, visit <https://connect.carthage.edu/device-registration>.
2. Enter your Carthage username and password (do not include the @carthage.edu). If your Carthage credentials are not allowing access, you may need to reset your password. You can do that at password.carthage.edu.

The screenshot shows a web page titled "Carthage Network Access" with a subtitle "Status - Login". Below the title is the instruction "Login to manage registered devices". There are two input fields: "USERNAME" and "PASSWORD". The "PASSWORD" field has a "SHOW" button next to it. At the bottom of the form is a large "Login" button.

3. Select 'Register another device' at the bottom of the page:

4. Enter your MAC address (If you need [help finding your MAC address, please click here](#) or search Google.) and select Register.

Network Access and Device Registration

Carthage Network Access

Registration

DEVICE MAC ADDRESS

Register

[Return to device list](#)

[Logout](#)

5. Your access to the Carthage network will be enabled and you will be asked to re-register each device in this manner every six months.
